GRUNDFOS

Our Purpose

To be a leader in the industry by providing enhanced services, relationship and profitability.

Mission

To enhance operational efficiency through innovative technology and superior service. We focus on creating long term relationships with our clients by delivering tailored solutions that address their process challenges

Vision

To provide quality services that exceeds the expectations of our esteemed customers.

Our Goals

- Regional expansion in the field of process management and develop a strong base of key customers.
- Increase the assets and investments of the company to support the development of services.
- To build good reputation in the field and become a key player in the industry.

Core Values

- We believe in treating our customers with respect and faith.
- We grow through creativity, invention and innovation.
- We integrate honesty, integrity and business ethics into all aspects of our business functioning.

Technical Service and Maintenance

Maximizing Plant Uptime. Ensuring Operational Excellence.

At IPS, our Technical Service & Maintenance team ensures your operations run smoothly with minimal downtime. We deliver expert support across every phase of your equipment's lifecycle

On-site Maintenance & Troubleshooting

- Rapid response to breakdowns and system failures
- Routine preventive maintenance tailored to your plant schedule
- Root cause analysis and corrective action plans
- Ensures safe, hygienic, and uninterrupted production

Equipment Commissioning & Refurbishments

- Start-up services for new installations to ensure optimal performance
- Mechanical and functional verification of components
- Refurbishment and reconditioning of pumps, valves, and heat exchangers
- Extends equipment lifespan and improves reliability

Component Repair & Optimization

- In-house and on-site repairs using genuine OEM parts
- Performance testing and calibration of valves, pumps, and mixers
- Upgrade and retrofit solutions to enhance efficiency and energy use
- Detailed reporting and service records provided for traceability

Process Plant Maintenance

Flow & Key Components

Supply of Pumps, Valves, Heat Exchangers
& Tank Equipment:

- Authorized distributor of Alfa Laval, Grundfos, and SPX FLOW components
- Hygienic and industrial-grade valves, centrifugal and positive displacement pumps
- Gasketed and brazed plate heat exchangers for precise thermal control
- Tank accessories including agitators, mixers, manways, and cleaning devices
- Products suited for dairy, beverage, water, and pharmaceutical applications

Project Support & Component Selection

- Technical guidance during plant upgrades and system expansions
- Equipment selection based on process specs, flow rates, and CIP requirements
- Tailored configurations to ensure efficiency, cleanability, and compliance
- Collaboration with OEMs to design fit-for-purpose solutions

In-House Stock Holding for Fast Delivery

- Local inventory of high-demand components for reduced lead times
- Quick turnaround on urgent spares, maintenance kits, and replacements
- Stock planning aligned with client plant schedules and seasonal needs
- Reduces unplanned downtime and ensures business continuity

Flow & Key Components

Technical Consultation & Customer Training

Empowering Our Clients with Knowledge and Expertise

At IPS, we believe that the best performance comes from well-informed teams. That's why we offer ongoing technical consultation and tailored training programs that ensure your staff and systems operate at their full potential.

Technical Consultation

- Process audits and performance assessments
- Troubleshooting support for process inefficiencies
- Guidance on system upgrades, expansions, and equipment selection
- Alignment with industry standards, OEM specifications, and regulatory compliance
- Collaborations with engineers, operators, and maintenance teams to optimize operations

Customer Training

- Hands-on and theoretical training for plant operators, technicians, and engineers
 - Delivered on-site or at IPS training facilities
 - Supported by OEM-certified experts and technical resources
