

Alfa Laval Unique SSV Aseptic

Single seat valves

Introduction

The Alfa Laval Unique SSV Aseptic is a versatile, reliable pneumatic single seat valve with a single contact surface between the plug and the seat to minimize the risk of contamination.

Its compact, modular and hygienic design meets the highest process requirements in terms of hygiene and safety. Built on the well-proven Alfa Laval Unique SSV platform, it features a one-piece diaphragm that provides hermetic sealing to prevent intrusion of contaminants from the atmosphere, ensuring full protection against the effects of microorganisms during processing. The special diaphragm can also be used with the Unique SSV Standard, Tangential, Two Step, Manual and Tank Outlet.

Few moving parts ensure easy maintenance, high reliability and low total cost of ownership. A wide range of optional features enables customization to specific process requirements.

Application

This Unique SSV Aseptic is designed for uninterrupted production in sterile and aseptic applications across the dairy, food, beverage, brewery, biotechnology, pharmaceutical and many other industries.

Benefits

- Durable, aseptic valve design
- Superior cleanability smooth inner valve body without crevices
- Extended seal life due to the defined seal compression
- Enhanced product safety due to the static seal leak detection
- Protection against bacterial contamination
- Easy to configure

Standard design

The Unique SSV Aseptic is available in a one- or two-body configuration, with easy-to-configure valve bodies, plugs, actuator and clamp rings. The valve can be configured for aseptic processing as a shutoff valve with two or three working ports or as a changeover valve with three to five ports.

To ensure flexibility, the valve seat that sits between the two bodies in the changeover version is provided for assembly. The valve seals are optimized for durability and long service life through a defined compression design. The actuator is connected to the valve body using a yoke, and all components are assembled with clamp rings.

The valve can also be fitted with the Alfa Laval ThinkTop V50 and V70 for sensing and control of the valve.

Using the Alfa Laval Anytime configurator, it is easy to customize to meet virtually any process requirement.

Working principle

The Alfa Laval Unique SSV Aseptic is operated by means of compressed air from a remote location. The actuator smooths operation and protects process lines against pressure peaks. An integrated valve plug/diaphragm secures aseptic operation. The valve can be controlled using an Alfa Laval ThinkTop®.

Certificates

Authorized to carry

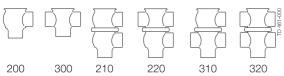

TECHNICAL DATA

| Temperature | | |
|--|-------------------------|--|
| Temperature range: | -10°C to +140°C (EPDM) | |
| Max. sterilization temperature (<1 min): | 150°C/380 kPa (3.8 bar) | |
| | | |
| Pressure | | |

| Pressure range: | 0-800 kPa (0-8 bar) |
|---------------------------------|-------------------------|
| Max. sterilization temperature: | 150°C/380 kPa (3.8 bar) |
| Air pressure: | 500-700 kPa (5-7 bar) |

Note! Vacuum is not recommended in aseptic applications.

Valve body combinations

Actuator function

- Pneumatic downward movement, spring return (NO).
- Pneumatic upward movement, spring return (NC).
- Pneumatic upward and downward movement (A/A).

PHYSICAL DATA

.

| 1.4404 (316L) |
|-----------------------------------|
| 1.4301 (304) |
| Semi-bright (blasted) |
| Bright (polished), Ra < 0.8 µm |
| EPDM |
| NBR |
| PTFE (Product wetted side) / EPDM |
| |

Options

- A. Male parts or clamp liners in accordance with required standard.
- B. Control and Indication: IndiTop, ThinkTop or ThinkTop Basic.
- C. Product wetted seals in HNBR or FPM.
- D. Low pressure actuator.
- E. High product pressure actuator.
- F. Maintainable actuator.
- G. 2 step / 3 position actuator (not for DN/OD 25 / DN 25).
- H. External surface bright.

Note!

For further details, see instruction ESE00529.

Other valves in the same basic design

The Unique SSV valve range includes several purpose built valves. Below are some of the valve models available, though please use the Alfa Laval Anytime configurator for full access to all models and options.

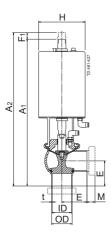

- Manually operated valve.
- Two Step valve.
- Tangential valve.
- Tank Outlet valve.

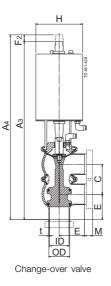

Semi-Maintainable actuator comes with 5 year warranty

For exact high pressure actuator dimension (A and F) - please refer to information in Anytime configurator

Please note!

Opening/closing time will be affected by the following:

- The air supply (air pressure).
- The length and dimensions of the air hoses.
- Number of valves connected to the same air hose.
- Use of single solenoid valve for serial connected air actuator functions.Product pressure.

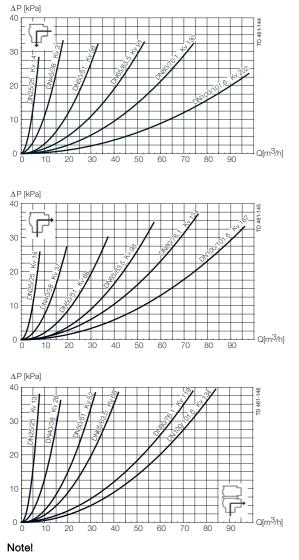

Air Connections Compressed air:

R 1/8" (BSP), internal thread.

Pressure drop/capacity diagrams

For the diagrams the following applies:

Medium: Water (20°C)

Measurement: In accordance with VDI 2173

Pressure drop can also be calculated in Anytime configurator.

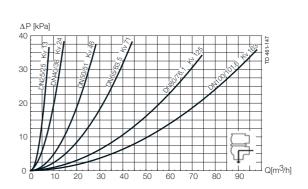

Pressure drop can also be calculated with the following formula:

 $\begin{array}{l} {\sf Q} = {\sf K} v \ x \ \sqrt{\Delta} p \\ \\ {\sf Where} \\ {\sf Q} = {\sf Flow in } m^3/h. \\ {\sf K} v = m^3/h \ at a \ pressure \ drop \ of 1 \ bar \ (see \ table \ above). \\ {\sf \Delta} \ p = {\sf Pressure \ drop \ in \ bar \ over \ the \ valve. } \\ \\ {\sf Where} \\ {\sf Q} = {\sf Flow \ in \ m^3/h. } \\ {\sf K} v = m^3/h \ at \ a \ pressure \ drop \ of 1 \ bar \ (see \ table \ above). \\ {\sf \Delta} \ p = {\sf Pressure \ drop \ in \ bar \ over \ the \ valve. } \\ \\ {\sf \Delta} \ p = {\sf Pressure \ drop \ in \ bar \ over \ the \ valve. } \\ \\ {\sf Q} = {\sf K} v \ x \ \sqrt{\Delta} p \\ \\ {\sf 2.5" \ shut-off \ valve, \ where \ Kv = 111 \ (See \ table \ above). } \end{array}$

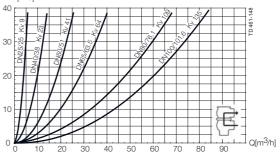

40 = 111 x √∆p

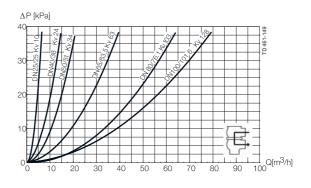

$$\Delta p = \left(\frac{40}{111}\right)^2 = 0.13$$
 bar

(This is approx. the same pressure drop by reading the y-axis above)

 $\Delta P [kPa]$
